

Iris Galea Lowell

Constitution form

Dear Sir/Madam,

As a Maltese citizen I would like to see some changes in our constitution. Perhaps what I say will not make sense but I still feel that it is time for some minor changes. For example America and Russia are referred to as super powers, today they are no longer so. I think we as Maltese would benefit if we change the way we look at them. Artisan ship is referred to as manual labor, it is manual labor but what kind of manual labor? Since even beech cleaners are manual labors. Would an artist who spent some years in MCAST would be the same as a beech cleaner? My third point is that abortion would become a constitutional issue. If for some time we have taken a stand against abortion, that is we do not accept the ending of a child's life in the womb, whether it is a zygote, a cytotblast, an embryo or a fetus. As soon as there is fertilization there is life. Then I think it can become a constitutional issue to avoid having this issue being discussed again and again. Together with abortion I think it is time to mention also Euthanasia as this is also discussed from time to time. We are Catholics with certain values which we should be proud of and cherish at all times. Now that we live in the robotic age medicine and research can do a lot for the better of man kind with out having to resolute to destruction.

Sincerely,

Iris Galea Lowell
